Phone: 6238533921 | Email: shabanajasminofficial@gmail.com | Location: Puthuppadi, Kozhikode, Kerala

SUMMARY

Dynamic Full Stack Developer with over 5 years of experience in designing and delivering scalable web applications using **Angular, TypeScript, Javascript, Node.js**, and modern frameworks. Having experience optimizing performance, implementing efficient code, and collaborating with cross-functional teams to achieve project goals. Proven ability to lead projects, mentor team members, and quickly adapt to new technologies. Passionate about creating innovative solutions and continuously advancing technical expertise.

EDUCATION

BSc in Computer Science – LISSAH College (Calicut University) *2018 – 2020*

TECHNICAL SKILLS

Languages:
JavaScript, TypeScript

Front-End:
Angular 13+, Ionic Angular, HTML, CSS, Bootstrap, Tailwind, Material Angular, RXJS, Handlebars

Back-End:
Node.js, Express.js, MongoDB, PostgreSQL, Firebase, REST API.

Version Control & CI/CD:
Git (GitHub, GitLab), Heroku, AWS (S3, EC2), Docker, GitLab CI/CD

Testing & Tools: Jest, Postman, Figma (Design)

PROFESSIONAL EXPERIENCE

Software Engineer – VVDN technologies *Oct 2024 – Present*

- Working on client project **Extreme Networks**
- Contributed to internal EV project **ICE EV**

Software Engineer – Fingent Global Solutions *Apr 2022 – Aug 2024*

- Designed scalable web applications using **Angular** and **Node.js**, achieving a 20% performance improvement.
- Designed and deployed a **Multi-Vendor E-Commerce Platform**, serving over 5,000 customers with real-time updates and reduced load times by 30%.

Senior Full Stack Developer – INIT Solutions *Sept 2021 – Mar 2022*

- Spearheaded the development of a **Ticketing System**, improving the efficiency of customer support by 25%.
- The legacy front-end code to **Angular 13+**, enhancing maintainability and performance.
- Implemented testing strategies using **Jest**, reducing bugs by 15%.

- Collaborated on database integration with **MongoDB** and **PostgreSQL**, ensuring seamless data flow.

Full Stack Developer – Zpacetech   *July 2020 – Aug 2021*

- Built an **Online Mediation Platform (Peace Gate)** using **Angular** and **.NET**, serving more than 1,000 users.

- Designed reusable UI components in **Angular**, accelerating development speed by 30%.

- Ensured seamless API integration with **Node.js**.

- Integrated **AWS S3** for scalable image storage and deployed applications using **EC2** instances.

PROJECTS

EP1 Platform
Technologies: Angular 15+, TypeScript, RXJS
Developed a web interface for managing wired and wireless network devices. Integrated real-time device status tracking, implemented reusable UI components, and optimized performance for large datasets.

EV Charging Management
Technologies: Angular, Node.js, MongoDB
Created an internal tool to track electric vehicle charging stations and vehicle data. Designed dashboards for charge status, history logs, and location mapping with real-time updates.

ADAPT+
Technologies: Angular 13+,
Project for managing events with test-driven development.

Peace Gate
Technologies: Angular, .NET, SQL Server
Developed an online platform for negotiation and mediation.

Ticketing System for Supermarkets
Technologies: Angular, Node.js, MongoDB
Built a ticket management system for the admin, customer support, and tech support roles to efficiently manage queries and complaints.

INR PAY
Technologies: Angular
Money Transfer and Bill Payment Front-End Development.

Get Follow
Technologies: Angular, MongoDB, AWS S3
Led the project from scratch, building a scalable social media platform.

I Tracker
Technologies: Angular, MongoDB, AWS S3
Led the project from scratch, building a scalable social media platform.

Multi-Vendor E-Commerce Platform
Technologies: Angular, Node.js, MongoDB, AWS S3
A scalable platform for vendors and customers, featuring admin panels, user dashboards, and real-time updates.

ADDITIONAL SKILLS

Cloud Services: AWS (S3, EC2), Heroku
API Integration: Google Maps
Operating Systems: Linux (Ubuntu, Mint), Windows
Soft Skills: Problem-solving, Multitasking, API Documentation, Team Collaboration
