SHABANA JASMIN

Senior Full Stack Developer

Angular | TypeScript | JavaScript | Node.js | Immediate Joiner

shabanajasminofficial@gmail.com | +91 6238533921 | Portfolio | LinkedIn | GitHub | Medium

PROFESSIONAL SUMMARY

Senior Full Stack Developer with **6+ years of experience** building scalable web applications using **Angular, React, TypeScript, JavaScript, Node.js and MongoDB**. Experienced in **Microfrontend architecture**, REST API integration, reusable components, PostgreSQL and **AWS**. Strong in enterprise application development, modernization, performance optimization and maintainable end-to-end solutions.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3
Frontend: Angular, React, RxJS, NgRx, AG Grid, AG Charts, Angular Material, Ionic Angular, Bootstrap, Microfrontends, Responsive Design
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, PostgreSQL, Firebase
Cloud & DevOps: AWS (EC2, S3, Lambda, API Gateway, CloudFront), Terraform, CDKTF, Docker, GitHub Actions, GitLab CI/CD, Heroku
Tools: Git, GitHub, GitLab, Jest, Postman, Figma
Practices: Agile Development, Performance Optimization, Component Architecture, System Design, API Integration, Code Reviews, TDD

PROFESSIONAL EXPERIENCE

VVDN Technologies (Client: Extreme Networks) Oct 2024 – Jul 2026 | Bengaluru
Senior Frontend Engineer
• Contributed to the **EP1 enterprise network management platform** using Angular within a **Microfrontend architecture**.
• Developed network monitoring modules, reusable UI components and **REST API integrations** with RxJS-based data flows.
• Supported **Angular modernization and migration** work, improving maintainability and performance.
• Developed the frontend for an **EV Charging Management Platform**, building dashboards for station status and operational monitoring.
• Prototyped a **React** solution integrating **Exotel and Vapi AI APIs** for voice communication workflows.

Fingent Global Solutions Apr 2022 – Aug 2024 | Bengaluru
Senior Frontend Engineer
• Led Angular frontend development for the **ADAPT+ event management platform**, delivering event workflows and user-management modules.
• Built reusable components and **Jest unit tests** to improve maintainability, release reliability and regression coverage.
• Optimized frontend performance and delivered responsive enterprise interfaces for event-management workflows.

INIT Solutions Sep 2021 – Mar 2022 | Bengaluru
Full Stack Developer
• Developed **Wonderla** booking and multilingual ticketing experiences using Angular and Ionic Angular for responsive web and mobile flows.
• Modernized legacy applications by migrating functionality to **Angular** and improving maintainability and bundle performance.
• Built **Peace Gate** role-based workflow modules using Angular and .NET, and developed **I Tracker** using Angular, Node.js and PostgreSQL.
• Deployed and hosted applications on **AWS (S3, API Gateway)** to support reliable delivery and performance.

Zpacetech Jul 2020 – Aug 2021 | Bengaluru
Full Stack Developer
• Built a **customer ticket-management platform from scratch** using Angular and delivered client-facing features.
• Developed **multi-vendor dashboards** using Angular, Node.js and MongoDB, including vendor, catalog and order-management workflows.
• Integrated **AWS S3, EC2, Lambda, API Gateway and CloudFront** into application workflows and supported reliable deployment and performance.

PROJECTS

EP1 Network Management Platform (Angular, TypeScript, RxJS)
• Built reusable monitoring components for device status, alerts, topology and live network data, supporting enterprise network visibility.
• Contributed to network-management workflows within a Microfrontend application, including responsive UI and API-driven data flows.
EV Charging Management Platform (Angular)
• Developed frontend dashboards for charging-station status, operational monitoring and fleet-level visibility.
• Built responsive views for usage tracking and day-to-day charging operations across web interfaces.
Multi-Vendor E-Commerce Platform (Angular, Node.js, MongoDB, AWS)
• Built vendor and admin dashboards covering catalog, order and vendor-management workflows for a multi-vendor platform.
• Developed reusable interfaces for seller onboarding, product management and platform operations.
Wonderla Website Platform (Angular, TypeScript, Ionic Angular)
• Developed booking, ticketing and slot-booking experiences for responsive web and mobile applications.
• Implemented multilingual user flows and responsive interfaces for a smooth customer booking experience.
Peace Gate (Angular, .NET, SQL)
• Built role-based modules supporting negotiation, mediation and arbitration workflows.
• Implemented case creation, party assignment and status-tracking interfaces for workflow management.
I Tracker (Angular, Node.js, PostgreSQL)
• Developed supermarket transaction and inventory workflows for product, stock and billing operations.
• Worked across Angular and Node.js services with PostgreSQL data for transaction and inventory management.
GET FOLLOW (Angular, MongoDB, AWS S3, EC2, Lambda, GitHub Actions)
• Built delivery tracking with live location, assignment status and delivery progress for field operations.
• Developed operational views for delivery assignments, status monitoring and day-to-day workflow management.
INR PAY (Angular)
• Developed frontend flows for money transfer, utility payments and customer payment operations.
• Implemented responsive recharge and bill-payment journeys with clear transaction workflows.
Moodify — AI-Powered Mood to Playlist Generator (React, TypeScript, Node.js, Express, Spotify API, OpenRouter)
• Built an AI-powered application that converts natural-language mood input into personalized Spotify playlists.
• Integrated LLM mood analysis, Spotify OAuth, API integration and automated playlist generation.

EDUCATION

Bachelor of Science in Computer Science — Calicut University | 2017 – 2020
